

Delta Intelligent Building Technologies Aligns Operations to Accelerate Smart Building Innovation

Vienna – January 21, 2026 – Delta Intelligent Building Technologies (Delta IBT), a division of Delta Electronics, today announced a strategic alignment of its global operations across Delta Controls, LOYTEC, Amerlux, March Networks, and VIVOTEK. This initiative is designed to deliver the next generation of intelligent building solutions through coordinated operations, shared expertise, and enhanced global support.

Responding to growing industry demand for integrated systems, Delta IBT is establishing three strategic Lines of Business—**Smart Building, Smart Lighting, and Smart Security**. Each business acts as a center of excellence that strengthens, rather than replaces, the expertise and identity of its established brands. All customer specifications, product lines, and certifications remain fully intact.

"We're not merging brands—we're aligning our operations to deliver greater value," said John Nicholls, President of Delta Intelligent Building Technologies. *"This structure allows us to leverage our global resources, engineering expertise, and regional teams to provide integrated solutions, regional manufacturing, faster innovation, and stronger local support."*

Hans-Jörg Schweinzer will lead the Smart Buildings Business which covers the Delta Controls and LOYTEC brands. Peter Strom will lead the Smart Security Business, incorporating the March Networks and VIVOTEK brands. Chuck Campagna will lead the Smart Lighting Business which includes Amerlux and a new range of lighting control technologies. John Nicholls will manage the combined entities providing strategy direction with aligned technology roadmaps amplified by Delta IBT's global resources and combined engineering capabilities.

The initiative positions Delta IBT to capture significant share of the rapidly growing intelligent building market. Commercial offices, universities, hospitality, data centers and healthcare can now deploy building controls, lighting, and security from a single unified operational platform with seamless coordination.

The operational alignment becomes effective March 1, 2026. All current operations, partnerships, and customer agreements continue without interruption. Additional information will be available at DeltaIBT.deltaww.com beginning March 1st.

About Delta Intelligent Building Technologies

Delta Intelligent Building Technologies combines the expertise of Delta Controls, LOYTEC, Amerlux, March Networks, and VIVOTEK to deliver integrated intelligent building solutions globally. Delta IBT is a division of Delta Electronics, a global leader in power and thermal management solutions.

About Delta Electronics

Delta Electronics (Delta), founded in 1971, and listed on the Taiwan Stock Exchange (code:2308), is a global leader in switching power supplies and thermal management products with a thriving portfolio of IoT-based smart energy-saving systems and solutions in the fields of industrial automation, building automation, telecom power, data center infrastructure, EV charging, renewable energy, energy storage and display, to nurture the development of smart manufacturing and sustainable cities. As a world-class corporate citizen guided by its mission statement, "To provide innovative, clean and energy-efficient solutions for a better tomorrow," Delta leverages its core competence in high-efficiency power electronics and its ESG-embedded business model to address key environmental issues, such as climate change. Delta serves customers through its sales offices, R&D centers and manufacturing facilities spread over close to 200 locations across 5 continents.

Throughout its history, Delta has received various global awards and recognition for its business achievements, innovative technologies and dedication to ESG. Since 2011, Delta has been listed on the Dow Jones Best-in-Class World Index (formerly the DJSI World Index of Dow Jones Sustainability™ Indices) for 14 consecutive years. Delta has also won CDP with double A List for 4 times for its substantial contribution to climate change and water security issues and has been named Supplier Engagement Leader for its continuous development of a sustainable value chain for 8 consecutive years.
